DIGI

Clean Connectivity.
No Compromise.

How Digi Connect® EZ 4i keeps car wash networks running strong — anywhere.

Challenge

A leading car wash technology provider needed more than just a connection — it needed resilient, real-world networking built for the front lines of the car wash industry.

What they were up against:

- Powering payment systems directly at the pump
- Running embedded hardware in **hot and confined environments**
- Supporting both **legacy serial** gear and modern **Ethernet** devices
- Fast deployment — **no time for complicated setups**

> "With Digi, we didn't just connect devices — we connected the business."
>
> — Digi Customer

Solution

Digi Connect® EZ 4i is built to thrive where others fail. This industrial-grade serial server delivered the flexibility, durability, and compatibility the customer demanded:

- **Made for extremes:** Operates from -40 °C to +74 °C — no A/C cabinet required
- **Multi-port muscle:** 4 serial ports + dual Ethernet = one box, total control
- **Protocol agility:** **Digi RealPort®** + TCP/UDP for smooth legacy and modern integration
- **Plug-and-play simplicity:** Web-based setup and the **Digi Navigator™** tool for fast deployment
- **Long-term reliability:** Backed by **Digi LifeCycle Assurance** for ongoing support and peace of mind

Outcome

✓ Seamless payment processing
✓ Future-ready infrastructure
✓ Less maintenance, more uptime
