

Connecting the Healthcare Industry

Digi Connect WS and ES provide reliable, secure, and safety-compliant connectivity for healthcare facilities.

Overview

Critical care environments and healthcare facilities rely on accurate patient data from connected medical devices. Digi's device-neutral connectivity enables secure integration with EHR and clinical monitoring systems.

Challenges

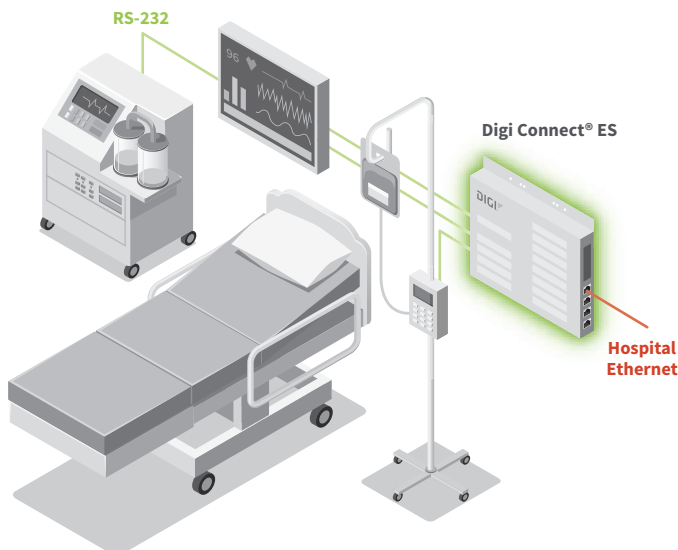

- Interface with a wide range of medical equipment and monitoring software
- Support secure wired and wireless connectivity
- Meet IEC 60601-1 compliance requirements for patient care environments

Solution

Digi Connect ES and WS provide secure serial-to-network connectivity for passive medical equipment monitoring and clinical data collection in medical electrical (ME) systems.

- **Digi Connect ES** provides galvanic isolation, Digi RealPort support, and Ethernet switching for nearby network devices.
- **Digi Connect WS** provides wireless connectivity, PoE support, and a compact VESA-mountable design.

Digi Connect WS and ES deliver reliable, secure, IEC 60601-1 compliant connectivity for healthcare facilities and patient care environments.
