

Control Utility Equipment with Ease

Digi Connect® EZ Revolutionizes Remote Equipment Management

Managing utility equipment and remote worksites can present logistical challenges. The **Digi Connect® EZ** family of products offers an innovative solution, empowering you to oversee and control equipment seamlessly, no matter where or when you need access.

Top 4 Utility Customer Improvements Using Digi Connect EZ

1 Efficient Operation in Challenging Conditions

Certain Digi Connect EZ models have been specifically designed to support extended temperature ratings, making them ideal for deployment in extremely hot or cold environments. Rest assured, each unit undergoes rigorous testing to guarantee resilient performance in even the most demanding applications.

2 Uninterrupted Connectivity for Critical Assets

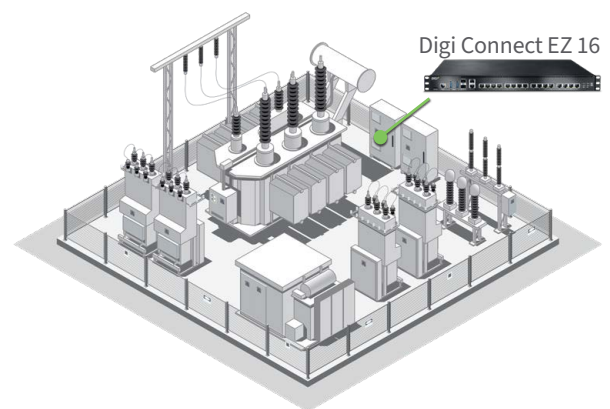

In situations where network outages occur, maintaining access to critical assets is crucial. Digi Connect EZ ensures accessibility by offering redundant Ethernet, as well as redundant SFP+ connections with Digi Connect EZ 8, 16, and 32 models. Additionally, Digi Connect EZ seamlessly transitions to cellular capability during failovers, guaranteeing uninterrupted access to vital assets. Worried about power issues? Digi Connect EZ 16/32 models address this concern with dual power options, enhancing the reliability of your operations.

3 Unmatched Accessibility and Control

Digi Remote Manager® (Digi RM) is an all-encompassing IoT device management platform, centralizing remote oversight for connected devices. It streamlines operations through automated features, enhancing device performance and security. Scalable and secure, it seamlessly integrates with Digi Connect EZ, amplifying control over critical assets in various operational settings.

4 Built-In Security

Digi Connect EZ products are built on top of **Digi TrustFence®**, an IoT security framework ensuring scalable, secure firmware updates through secure boot, protected hardware ports, and safe connections. This robust and built-in security system provides peace of mind against evolving threats for operations teams.
