

Digi Axxess VPN

Secure, simplified connections

Digi Axxess VPN provides a secure, scalable, and easy-to-use solution for remote device management, eliminating public IP risks while ensuring reliable and cost-effective connectivity.

Key Benefits

Secure access: Eliminates exposure to public Internet threats using private dynamic IP routing

Reliable performance: Built-in redundancy and encrypted tunnels for continuous security

Affordable and scalable: Cost-effective for businesses of all sizes

Easy setup: Integrates seamlessly with [Digi Axxess](#) and [Digi Z45 Industrial Controllers](#)

How It Works

- **Preactivated SIM is installed** and ready to use
- **Download an OpenVPN client**, and sign in using your Digi Axxess credentials.
- **Use your client to connect** remotely to your devices

[Get started with Digi Axxess VPN today!](#)

Use Cases

- Remote access to industrial equipment
- Secure connectivity for field teams
- Centralized IoT device management
- Resilient uptime for critical systems
