

Do More With Your Data — For Less

Digi Data Plans: Lower rates, and advanced network management

Increase visibility and save money with your data plan

Digi Remote Manager® (Digi RM) coupled with Digi data plans can help you save money and improve network management. With Digi, your plan just got cheaper. Our negotiated data plans with leading data providers allow us to pass savings on to you. Furthermore, Digi Remote Manager allows you to save money while managing your network more efficiently.

How You Save:

Leading Carriers	Digi Data Plan	Digi RM	Digi Data + Digi RM	Your Savings

Connectivity

Data Usage

Cost Savings

Digi Remote Manager

[Digi Remote Manager](#) offers secure, scalable management of all of your devices, wherever they are deployed, for less than the cost of most standalone cellular connectivity plans.

- Monitor IoT devices, asset performance and security with bi-directional communications
- Automate mass firmware and software updates to enhance functionality, stay in compliance and scale your deployment
- Manage your configurations
- Receive real-time alerts and detailed reports on network health and device conditions

"Digi saved our company \$15,500 over two years by switching to the Digi data plan and adding Digi Remote Manager to automate our processes"

-Digi Customer
