

Digi Improves Grocery Store Operations, Saving Time and Money

Maintaining a large grocery chain is easier with Digi.

Challenge

California-based Vallarta Supermarkets frequently experienced mid-day cash register outages across their 50 locations and required a solution to prevent further downtime during peak business hours.

Solution

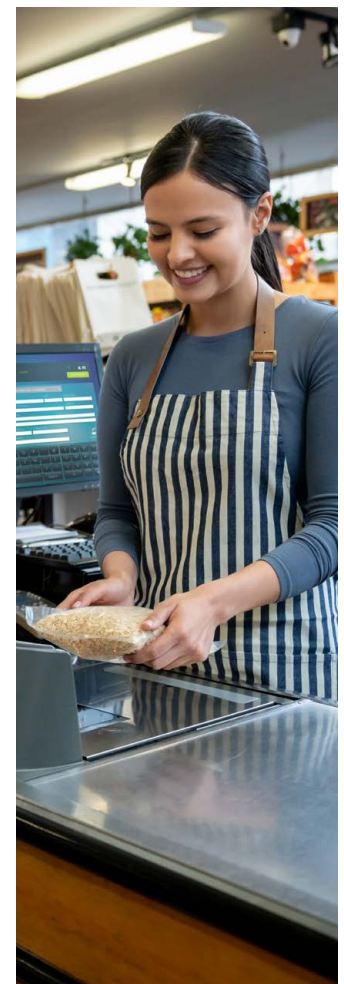

[Digi AnywhereUSB® Plus](#) provided seamless connectivity for their entire server and cashier system across all locations. What Vallarta loves about the device:

- Click and upload directly from the cloud
- The device is robust and high-quality
- Seamless integration with no downtime

Outcome

Centralized remote access allows the corporate store systems team to identify and correct issues quickly and efficiently and enables automation of system-wide updates with one click.

Digi AnywhereUSB® Plus saves hours, labor, and increases store ROI as employees can continue ringing items and providing customers with a positive experience.

“Our IT engineer put the solution to the test over fifty times to ensure accuracy and durability. The device is robust, easy to set up, and the automatic protocol for updates can’t be beat.”

— Edwin Ruano, Director of IT Operations & Support, Vallarta Supermarkets
