

Traffic Management: The Next Generation

Upgrade and optimize your system fast and cost effectively

Intelligent traffic management

Digi offers secure, scalable, high-performance traffic management communication solutions to improve congestion and provide centralized management and control. Reliable, configurable, high-speed cellular communications are paired with Digi Remote Manager® to prepare Smart Cities for evolving technologies, including Connected Vehicle and the deployment of 5G.

20 minutes to online

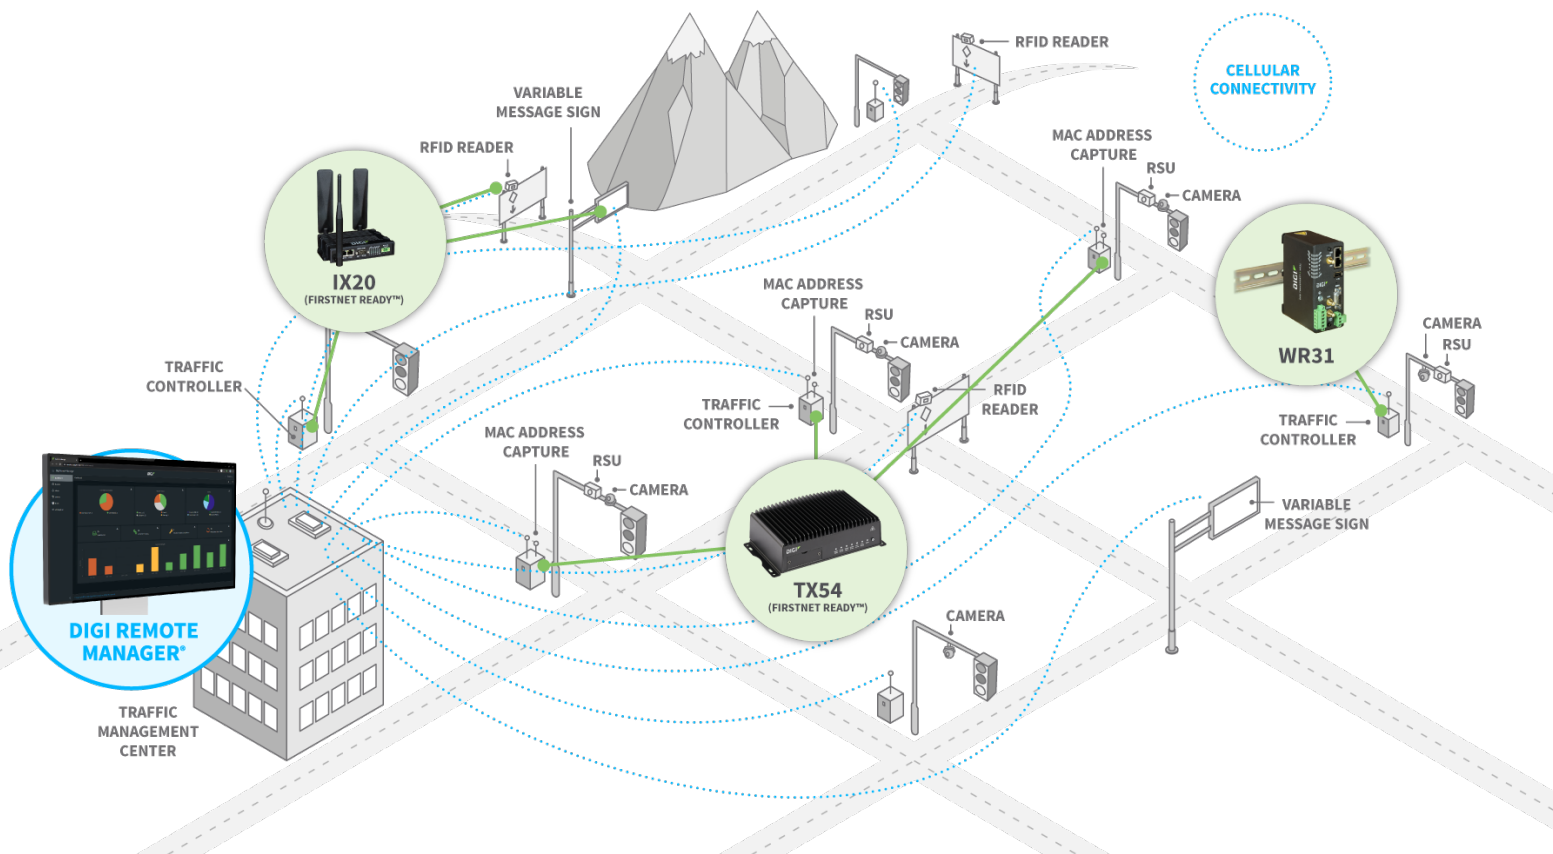

Configure and deploy faster and more effectively with the configuration tools in Digi Remote Manager. Cut deployment costs by completing installs in record time.

Security from ransomware

Install, monitor and manage your deployed solution with confidence. Digi TrustFence®, the robust security framework integrated into Digi cellular routers, provides multi-layer protection from cyberthreats.

Connected, autonomous future

Deploy connected vehicle functionality into your traffic management solution today to be prepared for what's to come. Digi helps your ITS team plan for future technology, such as connected vehicle and 5G.

Recommended products

Digi IX20

Single traffic applications

- LTE Cat 4
- Dual SIM, single Ethernet, single serial
- Ideal for:
 - Industrial environments
 - Single access points
 - Isolated traffic controllers
 - Single traffic cameras
 - Low-power connections
 - Variable message signs
 - Cellular backup (failover)

Digi WR31

Multiple traffic applications

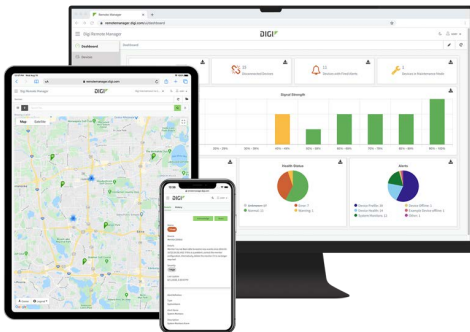

- LTE Cat 6
- Dual SIM, dual Ethernet, single serial
- Ideal for:
 - High-temp applications
 - Traffic cameras
 - Roadside units (RSUs)
 - Traffic controllers
 - Digital/analog applications
 - RFID readers
 - Cellular backup (failover)

Digi TX54

Complete solution

- LTE Cat 12 (one or two modules)
- Wi-Fi, Bluetooth, serial, 4 Ethernet
- Ideal for:
 - All traffic applications
 - First responder communications
 - Vehicle and body cameras
 - Connected vehicle
 - GPS location services
 - Automated license plate reader
 - Cellular backup (failover)

Digi Remote Manager

Presenting the technology platform that brings networks to the next level, allowing them—and the people who manage them—to work smarter. With Digi Remote Manager, you can transform a multitude of IoT devices into a dynamic, intelligent network. Now you can easily deploy, monitor and diagnose thousands of mission-critical devices from a single point of command.

Digi can help you transition to smart traffic management

EMERGENCY ROUTING

ADAPTIVE CONTROL

BACKHAUL COMMUNICATION

CONNECTED VEHICLE

PUBLIC TRANSIT

SIMPLIFIED INFRASTRUCTURE
