

Digi XBee Data Plans

Optimize cellular connectivity with Digi XBee® Data Plans, SIM cards and support services including 5G and LTE for your devices and deployments

Digi XBee Data Plans take advantage of Digi’s carrier relationships and expertise to power your application with 5G, 4G/3G LTE, Cat-M and NB-IoT cellular data services on the major U.S. carriers, as well as options for international plans.

Digi provides network access through major cellular partners around the globe with data plans designed to deliver reliable, cost-effective connectivity. Unlike other providers, we are not limited to one carrier; Digi will work with you to create a strategy that checks all the boxes for your network connectivity needs, wherever you deploy throughout over 200 countries across the globe.

Digi XBee Data Plans are preconfigured based on our experience with industry and product-specific connectivity needs. Digi can also customize your connectivity solution based on your technical requirements and geographic distribution of your deployment.

We provide a complete out-of-band management experience complemented by cellular connectivity services. With our tiered service model, customers select the coverage based on their use case instead of arbitrary data plan limitations. Our data packages are built with IoT in mind to cover the range of connectivity needs.

Digi offers a full hardware and cellular connectivity solution set, including activation of pre-embedded SIMs in **Digi XBee solutions**, APN configuration prior to manufacturing, or after-market installation of Digi provided SIMs and connectivity service plans.

Key features, benefits and applications

- Simple cellular connectivity and cost-effective solution
- Accelerated time-to-value
- Tiered data plans start with a single megabyte up to multi-gigabyte options
- Pay-per-use plans provide a cost-effective, elastic approach to your changing connectivity needs
- Pay only for the data you consume, and eliminate overage fees
- All **Digi XBee** cellular devices are available with SIM card inserted variants for easy and reliable customer activation
- Single point of support to resolve network connectivity issues and device configuration

ACTIVATE AND MANAGE DATA PLANS

Work with Digi for your SIM and data management needs. Activate data plans by phone at (877) 890-4014 or (952) 912-3456, or email at data.plan.quotedesk@digi.com.

DIGI XBEE DATA PLANS

Managed Connectivity

Digi XBee Data Plans and Cellular Connectivity Services

Today, Internet of Things (IoT) operations are spread over vast areas or are located in dangerous or otherwise hard-to-reach locations, and connecting to your devices can be expensive and time consuming.

Our cellular connectivity services complement Digi's network resilience platform, and enable easy connection to our partners' award-winning global cellular networks.

GLOBAL SERVICES FOR IOT APPLICATIONS

Digi XBee Data Plans deliver simple, cost-effective and accelerated cellular connectivity services in over 180 countries.

The Digi Connectivity Services team helps you quickly set up data plans for your IoT applications, making it a simple and convenient process to add cellular connectivity to your deployments.

This service provides cellular data options that are ideal for IoT applications at competitive rates without the hassle of multi-source solutions. Speed your project to market by allowing Digi to streamline these processes with our expertise and experience.

SIMPLE CELLULAR CONNECTIVITY

Avoid complex carrier contract negotiations, commitments and lengthy implementation processes. All agreements are in place today. Our connectivity services are easy to activate and ready on day one.

COST-EFFECTIVE RESOLUTION

Cellular connectivity can be complex and expensive if not done right. Do not overpay for the connectivity you do not use, or pay extra (overage charges) for the services you need. We can help you right-size your connectivity services.

ACCELERATED TIME-TO-VALUE

Finding the right solution does take time. Implementing the right connectivity service can add weeks to months to your deployment. Accelerate your time-to-connectivity. Receive an active SIM as early as two days and install it the same day, or activate SIM cards already inserted into your device in manufacturing.

Activate data plans by phone at (877) 890-4014 or (952) 912-3456, or by email at data.plan.quotedesk@digi.com.

SIMPLIFIED DATA PLAN MANAGEMENT

Working with Digi for your SIM and managed connectivity services can quickly reduce your project complexity, especially for embedded designs. Digi can insert SIMs and configure APNs prior to the manufacturing process. Taking this step saves after-market time by moving these components to the pre-production processes.

- ✓ There is no need to burden your in-house engineering team or pay for contract manufacturers to manage these processes.
- ✓ Digi provides a single point of support. We will work with you to troubleshoot and resolve network connectivity issues as well as device configuration concerns.
- ✓ SIM card, management, and administrative fees are all included in the monthly rate.

SUPPORT FOR CHOOSING YOUR PROTOCOL

When you are launching your project, the choices for connectivity options can be daunting. Should you go with LTE Cat-M or NB-IoT? Public or private? What about static IP? And how do you deploy for multiple geographic regions?

Digi Managed Connectivity Services help customize your connectivity solution based on your technical requirements and the anticipated geographic distribution of your deployment.

DIGI XBEE DATA PLANS

Part Numbers

PART NUMBERS		DIGI XBEE DATA PLANS*	
DIGI XBEE DATA PLANS C AT&T			
CELL-ATT-MAF		Pay per use plan monthly access fee for active SIMs on AT&T Global	
CELL-US-AT-USAGE		Cost for data usage on pay per use plan on AT&T Global	
CELL-GL-ATT-1MB		1 MB pooled data plan on AT&T Global	
CELL-GL-ATT-2MB		2 MB pooled data plan on AT&T Global	
CELL-GL-ATT-5MB		5 MB pooled data plan on AT&T Global	
CELL-GL-ATT-10MB		10 MB pooled data plan on AT&T Global	
CELL-GL-ATT-25MB		25 MB pooled data plan on AT&T Global	
CELL-GL-ATT-50MB		50 MB pooled data plan on AT&T Global	
CELL-GL-ATT-100MB		100 MB pooled data plan on AT&T Global	
CELL-GL-ATT-300MB		300 MB pooled data plan on AT&T Global	
CELL-GL-ATT-500MB		500 MB pooled data plan on AT&T Global	
DIGI XBEE DATA PLANS – VERIZON			
CELL-VZW-MAF		Pay per use plan monthly access fee for active SIMs on Verizon	
CELL-US-VZ-USAGE		Cost for data usage on pay per use plan on Verizon	
CELL-US-VZW-1MB		1 MB pooled data plan on Verizon	
CELL-US-VZW-2MB		2 MB pooled data plan on Verizon	
CELL-US-VZW-5MB		5 MB pooled data plan on Verizon	
CELL-US-VZW-10MB		10 MB pooled data plan on Verizon	
CELL-US-VZW-25MB		25 MB pooled data plan on Verizon	
CELL-US-VZW-50MB		50 MB pooled data plan on Verizon	
CELL-US-VZW-100MB		100 MB pooled data plan on Verizon	
CELL-US-VZW-300MB		300 MB pooled data plan on Verizon	
CELL-US-VZW-500MB		500 MB pooled data plan on Verizon	
ADDITIONAL SECURITY SERVICES			
XB-SECURE-SIM		Additional security features for Digi XBee Data Plans (AT&T only) with metrics-based actions, proactive alerts and SIM lock	

*1 year subscription paid annually and 3-year subscription paid every 3 years.
