

Get Instant Edge Data Flowing on Your Factory Floor

Digi Connect[®] Sensor XRT-M + MQTT is the backbone of modern smart factories.

Challenge

With teams at capacity, factories need immediate visibility into issues like pump vibration, and pressure drops. Existing systems often struggle with slow performance or a lack of reliability.

Solution

Digi Connect Sensor XRT-M + MQTT is built for industrial environments. It provides manufacturers with “The Ultimate Hookup” — a fast, reliable, and easy-to-deploy edge data solution.

- Install in under 10 minutes
- Wireless sensors stream data directly to the MQTT Broker
- No coding or heavy IT lift required
- Flexible integration with [Digi Axess](#), your own system, or both

Outcome

No more reacting too late. With Digi Connect Sensor XRT-M with MQTT, systems start making proactive moves — automatically.

- Instant visibility into critical equipment
- Early warnings to prevent failures
- Smarter production decisions based on instant insights
- Lower costs from faster installs and fewer outages
