

# Modernize Your Digi One SP Serial Connectivity Solution

**Digi Connect EZ** is secure, fast, and easy to deploy.

Why replace equipment when you can update the way you talk to it?

**Digi Connect® EZ** modernizes operational infrastructure with expanded network connectivity and functionality for today's applications. It is designed to meet the demands of a wide range of critical serial applications including connecting to automation, robotics control, centralized device management, data acquisition and point-of-sale equipment.

As industries continue to evolve, the need for cutting-edge technology grows. The Digi One® product family has been a trusted name in automation connectivity, but now is the time to make the transition to the Digi Connect® EZ family of products. With enhanced connectivity options and lightning-fast speeds, this family of products is a game-changer for your operations. Say goodbye to the limitations of the past and hello to a new era of efficiency and productivity. The future is now, and it is time to take full advantage of the benefits that Digi Connect® EZ can bring to your business.

## Security

Digi Connect EZ and built-in **Digi TrustFence®** protect against evolving security threats with encrypted connections, centralized authentication, VPN support and scalable security updates.

## Flexibility

Configure in minutes without having to modify equipment or applications. Digi Navigator™ allows for the discovery of Connect EZ devices on a local network for a quick and easy setup.

## Manageability

Simplify key security requirements for critical infrastructure and distributed systems with enhanced access control, management and configuration capabilities.
