

Providing a Reliable Serial Connectivity Solution for a Federal Transportation Agency

Digi Connect® EZ is the ultimate hookup for replacing legacy serial infrastructure without a costly overhaul.

Challenge:

A federal transportation agency needed to replace aging serial infrastructure — *fast*. Their legacy equipment lacked flexibility, power, and programmability.

Solution:

They turned to a trusted alliance: **Digi Connect® EZ 4** is the ultimate hookup for their edge connectivity challenge. Our solution proved to be just the compact, modern edge device they needed; the solution delivers:

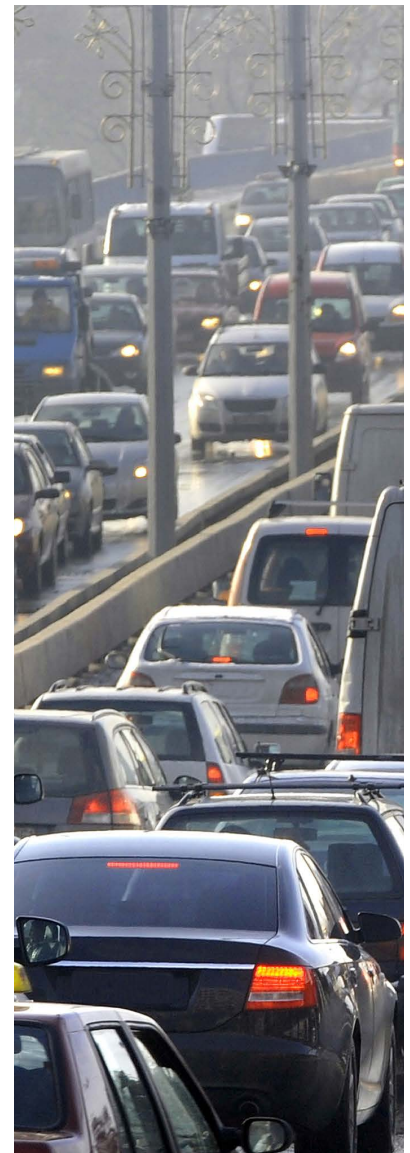

- ✓ Serial-to-Ethernet + TCP/IP — smooth connectivity upgrade
- ✓ Python 3+ ready — automation at the edge
- ✓ LTE modem support — serial-to-LTE flexibility
- ✓ 4-port, compact design perfect for mobile/remote use
- ✓ On-premises management — secure deployments anywhere

Outcome:

The company now has upgraded connectivity, without performing a costly, full-scale technology replacement. They now also enjoy added benefits including:

- Flexible LTE for remote operations
- Smarter workflows with Python automation
- Seamless path from pilot to full rollout
