Runway Ready, No Delays

When FAA compliance was on the line, Digi delivered a drop-in solution — fast, reliable, and future-ready.

Challenge: A flight-critcal fix, delivered fast

An aviation tech leader needed a rapid, FAA-approved solution to update safety systems at flight-critical sites — before their next-gen products were fully qualified. The mission was urgent, high-stakes, and crucial for maintaining the security and up-to-date status of flight-critical facilities.

Solution: Swift, reliable, and ready to scale

Digi moved quickly to support the customer's requirements with a complete migration path from the legacy Digi ConnectPort LTS to the new **Digi Connect EZ 16 and 32** solution for rapid serial connectivity — matching form, fit, and function to keep the project on track.
The Digi solution checked all of the boxes, including:

✓ Instant availability
✓ Rigorous testing
✓ Flawless compatibility

The result? The customer trusted Digi's expertise and placed an order for 105 units — secured uninterrupted operations.

Outcome: Compliance today, ready for tomorrow

Digi ensured a seamless deployment by confirming identical power designs — eliminating the need for costly requalification. The result: uninterrupted FAA compliance and a clear path to next-generation Digi Connect® EZ 16 and 32 port units.

When reliability and compliance are mission-critical, Digi delivers. Ready to elevate your operations? Let's talk.
