Digi Infrastructure Management

The **Ultimate** Hookup

For your mission-critical assets — from the field to the data center

Orchestrate edge-to-cloud connectivity with a unified suite of tools — rugged devices, secure networks, and centralized visibility.

Featured Solutions

Digi AnywhereUSB® Plus

- **USB over IP connectivity:** Remotely access and manage USB devices over a secure network

- **Secure and scalable**: Available in 2, 8, and 24-port models with strong encryption and **Digi TrustFence®**

- **Flexible integration**: Supports Windows, Linux, and virtual environments with 1-year Digi LifeCycle Assurance, 24x7 support and device management

Digi Connect® EZ

- **Easy serial-to-network connectivity**: Securely connect serial devices over Ethernet or LTE

- **Secure and reliable**: Strong encryption, authentication, and **Digi TrustFence®** security

- **Flexible options**: Available in 1, 2, 4, 8, 16, and 32-port models with 1-year Digi LifeCycle Assurance, 24x7 support and device management

Featured Solutions

Digi Connect® IT 16/48

- **Reliable out-of-band management:** Ensure remote access to critical IT infrastructure over LTE or Ethernet

- **Scalable and secure:** Available in 16- and 48-port models with encryption and **Digi TrustFence®** security

- **Centralized management:** Easily monitor and control devices with 1-year Digi LifeCycle Assurance, 24x7 support and device management

NOW INCLUDING

LifeCycle Assurance

Digi Connect® Sensor XRT-M

- **Remote industrial monitoring:** Securely transmit sensor data over LTE for instant insights

- **Rugged and reliable:** IP68-rated for harsh environments with long battery life

- **Easy deployment:** Supports multiple sensor inputs and integrates with **Digi Axess**

NOW INCLUDING

DIGI AXESS

Digi Z45 Industrial Controllers

- **Advanced industrial control:** Automate and manage industrial systems with powerful edge computing

- **Versatile and scalable:** Remote access, rugged design, and multiple connectivity options

- **Flexible integration:** Supports custom applications, cloud connectivity, and **Digi Axess**

NOW INCLUDING

DIGI AXESS
