

# Upgrade to the Future

Transitioning Digi ConnectPort® TS 8 to Digi Connect® EZ 8

**Digi Connect® EZ 8** is a modern, high-performance alternative to **Digi ConnectPort® TS 8**, offering improvements in speed security, manageability, and ease of use — ideal for businesses interested in enhancing serial-to-network connectivity.

## Key Advantages of Digi Connect® EZ 8

### Performance Upgrades

- ✓ **Higher serial speeds** — Supports up to 921.6 Kbps
- ✓ **Faster Ethernet** — Gigabit Ethernet (10/100/1000 Mbps) for better network performance over Digi ConnectPort TS 8's 10/100 Mbps limit
- ✓ **Expanded memory and storage** — Increased RAM and flash memory improve stability and support for complex configurations
- ✓ **Expanded processing power** — Improved hardware enhances data throughput and responsiveness

### Advanced Security Features

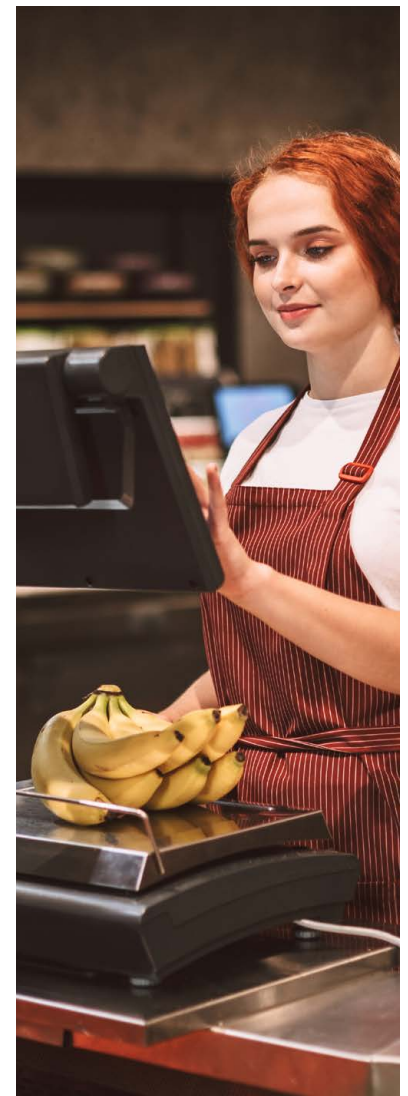

- ✓ **Modern encryption** — TLS 1.2/1.3, SSH, and HTTPS, for secure remote access and data transmission
- ✓ **Built-in firewall and secure boot** — Prevents unauthorized access and cyber threats.
- ✓ **Role-based access control (RBAC)** — Granular user management for enhanced security in multi-user environments

### Simplified Deployment and Management

- ✓ **Zero-touch configuration** — Automatic and cloud-based set-up reduces deployment time
- ✓ **Digi Remote Manager® (Digi RM) integration** — Enables cloud-based monitoring, bulk configuration, and firmware updates

### Scalability and Future-Proofing

- ✓ **More model variants** — Available in 1, 2, 4, 8, 16, and 32 serial port configurations for diverse deployment needs
- ✓ **Digi LifeCycle Assurance** — Enhanced level of service and support to protect critical connectivity systems
