

Safety Instructions

Digi TransPort® WR21

90001939-88 E

Safety notices for the Digi TransPort WR21

- Please read all instructions before installing and powering the unit. Keep these instructions in a safe place for future reference.
- If the power supply shows signs of damage or malfunction, stop using it immediately, turn off the power and disconnect the power supply before contacting your supplier for a repair or replacement.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Use only the accessories, attachments, and power supplies provided by the manufacturer; connecting non-approved antennas or power supplies may damage the unit, cause interference or create an electric shock hazard, and will void the warranty.
- Do not attempt to repair the product. The unit contains no electronic components that can be serviced or replaced by the user. Any attempt to service or repair the unit by the user will void the product warranty.
- Products in the TransPort WR family are designed for indoor use (except for the WR44 R) and should be used in an environment that is suitable for computers and other electronic equipment.
- Ports that are capable of connecting to other apparatus are defined as SELV ports. To ensure conformity with IEC60950, ensure that these ports are only connected to ports of the same type on other apparatus.

Product disposal instructions

The WEEE (Waste Electrical and Electronic Equipment: 2002/96/EC) directive has been introduced to ensure that electrical/ electronic products are recycled using the best available recovery techniques to minimize the impact on the environment.

This product contains high quality materials and components that can be recycled. At the end of its life this product **MUST NOT** be mixed with other commercial waste for disposal. Check with the terms and conditions of your supplier for disposal information.

Digi International Ltd WEEE Registration number: WEE/HF1515VU

Special notes on safety for wireless routers

Digi International products are designed to the highest standards of safety and international standards compliance for the markets in which they are sold. However, cellular-based products contain radio devices that require specific consideration. Please take the time to read and understand the following guidance. Digi International assumes no liability for an end user's failure to comply with these precautions.

Wireless routers incorporate a wireless radio module. Users should ensure that the antenna(s) is (are) positioned at least 20 cms away from themselves and other persons in normal operation.

When in a hospital or other health care facility, observe the restrictions on the use of mobile phones. Do not use the device in areas where guidelines posted in sensitive areas instruct users to switch off mobile phones. Medical equipment may be sensitive to RF energy.

The operation of cardiac pacemakers, other implanted medical equipment and hearing aids can be affected by interference from cellular terminals such as the wireless routers when placed close to the device. If in doubt about potential danger, contact the physician or the manufacturer of the device to verify that the equipment is properly shielded. Pacemaker patients are advised to keep the wireless router away from the pacemaker while it is on.

Wireless routers must **NOT** be operated on aircraft. The operation of wireless appliances in an aircraft is forbidden to prevent interference with communications systems. Failure to observe these instructions may lead to the consequences including suspension or denial of cellular services to the offender and potential legal action.

As with any electrical equipment, do not operate the device in the presence of flammable gases, fumes or potentially explosive atmospheres. Radio devices should not be used anywhere that blasting operations are taking place.

Wireless routers receive and transmit radio frequency energy when power is on. Interference can occur if used close to TV sets, radios, computers or inadequately shielded equipment. Follow any special regulations and always power off your device wherever forbidden or when it may cause interference or danger.

SOS IMPORTANT! Wireless routers operate using radio signals and cellular networks, and cannot be guaranteed to connect in all possible conditions. Therefore, never rely solely upon any wireless device for life-critical communications.

Warning: For environments where the temperature is 55° Celsius (131° Fahrenheit) or above, this device must be installed in a restricted access area.

Additional country approvals

Thailand

This telecommunication equipment is in compliance with NTC requirements.

This radio communication equipment has the electromagnetic field strength in compliance with the Safety Standard for the Use of Radio communication Equipment on Human Health announced by the National Telecommunications Commission.

อุปกรณ์โทรคมนาคมนี้เป็นไปตามข้อกำหนดของคณะกรรมการกิจการโทรคมนาคมแห่งชาติ (กทช.)

อุปกรณ์วิทยุสื่อสารนี้มีความแรงของสนามแม่เหล็กไฟฟ้าที่เป็นไปตามมาตรฐานความปลอดภัยต่อสุขภาพของมนุษย์สำหรับการใช้งานอุปกรณ์วิทยุสื่อสาร
